PORTFOLIO ANALYSIS

sergioayala.design - Section-by-Section Audit & Recommendations

SECTIONS REVIEWED

08

CRITICAL FIXES

06

MEDIUM IMPROVEMENTS

05

LOW / POLISH

05

STACK

Vanilla JS · CSS3 · Canvas · GSAP

SECTION	COMPLETENESS	STATUS	PRIORITY
\$1 · Intro		80% · functional	MEDIUM
\$2 · About		85% · bug present	HIGH + BUG
\$3 · Art Direction		80% · no visuals	HIGH
\$4 · Photography		90% · cards empty	HIGH
\$5 · Illustration		85% · no artwork	HIGH
\$6 · Blog		40% · all links dead	CRITICAL
\$7 · Contact		90% · no form	MEDIUM
\$8 · Navigation		70% · no mobile	HIGH

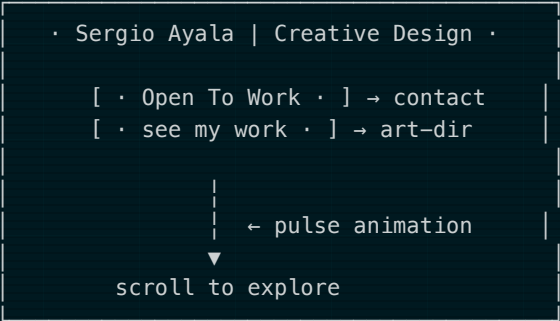

CURRENT STATE

- ✓ H1 glitch title – polished
- ✓ Dual CTA: "Open To Work" → contact
- ✓ Dual CTA: "See my work" → art-direction
- ✓ Cyberpunk panel slides in at 2s
- ✓ Social icons (Instagram, LinkedIn)
- ✓ Particle orb + VHS overlays

ISSUES

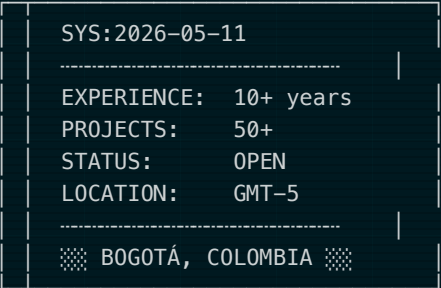

- No scroll affordance – users may stall
- Cyberpunk panel is decorative only – shows just a date
- Scroll-hint component exists in code but is not wired to intro

SUGGESTION A · SCROLL HINT

scroll-hint.js + scroll-hint.css
already exist – just needs wiring.

SUGGESTION B · CYBERPUNK PANEL LIVE STATS

Same data already in about section.
Zero new content needed.
Reuse existing metrics.

CURRENT STATE

- ✓ Two-column layout with bio + metrics
- ✓ DNA capsule 3D animation
- ✓ Certificate gallery (9 certs)
- ✓ Skills section (8 categories)
- ✓ Paul Rand quote block
- ✓ Seal CTA button (animated SVG)

ISSUES

- Seal CTA has placeholder@mail.com – production bug
- Skills are text-only – no visual depth or proficiency signal
- No CV download – primary hiring manager artifact is missing
- No lazy loading on 9 cert images

BUG FIX · SEAL CTA EMAIL

Current:
href="mailto:placeholder@mail.com"
^^
BROKEN – sends to nobody

Fix option A (direct email):
href="mailto:sergionook@gmail.com"

Fix option B (preferred – stay in UX):
href="#contact"
↓
DeLorean scene activates
user experiences the contact section
more memorable than a mailto dialog

SUGGESTION · CV BUTTON + SKILLS BARS

CV button – add below metrics row:
10+ years · 50+ projects · Bogotá-World

[· download CV ·] ← matches nav-btn style

Skills section – hover reveals bars:	
BEFORE	AFTER (on scroll-enter)
· Art Direction	· Art Direction 85%
· Photography	· Photography 90%
· UX/UI Design	· UX/UI Design 85%
· Branding	· Branding 75%

Uses same IntersectionObserver pattern
already in place for about section.

CURRENT STATE

- ✓ ART DIRECTION letter grid with RGB glitch
- ✓ Accordion slider with 5 disciplines
- ✓ Specs table per slide (Scope, Tools, Year, Mode)
- ✓ Discipline list on left rail
- ✓ GSAP entrance animation

ISSUES

- No project imagery – specs + text only. Reads like a resume, not a portfolio
- No "View project" link on any slide
- Letter grid animates but is not interactive – missed opportunity

SUGGESTION A · THUMBNAIL STRIP INSIDE EACH SLIDE

01 · BRANDING

img

img

img

img

← 4 project thumbnails
hover → title + year
click → lightbox

Scope: Brand Identity

Tools: Figma, AI

Year: 2025

[· view project →]

SUGGESTION B · LETTER GRID AS NAVIGATION

A R T	D I R E C T I O N	
hover	hover	hover
"Brand"	"Editorial"	"Motion"
click →	accordion jumps to that discipline (data-discipline attribute already on slides)	

Zero new content needed – pure JS interaction.

CURRENT STATE

- ✓ 52 photos across 4 categories with full metadata
- ✓ Scroll-driven 3-phase animation system
- ✓ Hover-preview → polaroid unit with canvas VFX
- ✓ Instagram promo block
- ✓ Electric border SVG filter on accordion

ISSUES

- 50 polaroid scroll-gallery cards are border-only – no images inside
- The scroll phases 3-10 are scaffolded but visually empty
- No lightbox on polaroid click – preview only, no full-screen
- Instagram promo disconnected from scene visually

SUGGESTION A · POPULATE POLAROID CARDS (50 IMAGES EXIST IN /IMAGES/PHOTO/)

SCROLL PHASE 3-10 · CURRENT

border-only (amber outline)

SUGGESTED

Mapped from existing photo archive
Data mapping task – no new assets needed

SUGGESTION B · LIGHTBOX ON POLAROID CLICK

hover accordion item

image previews in polaroid (current ✓)

click polaroid

← NEW

CURRENT STATE

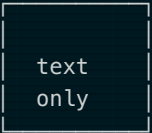

- ✓ 3D CSS cube with 6 navigable faces
- ✓ 6 concept slides with titles + technique tags
- ✓ Navigation dots + prev/next
- ✓ HUD overlay with percentage counter
- ✓ Ink cursor trail effect
- ✓ WebGL shader bg (written but disabled)

ISSUES

- No actual illustration artwork visible anywhere
- Cube faces are blank – concepts described in text only
- HUD "000%" counter never changes – purely decorative
- WebGL shader background is written but disabled

SUGGESTION A · ARTWORK ON CUBE FACES

CURRENT

→

SUGGESTED

← actual illustration on each face

Caption card shows: title + technique + year
"Flip the Prompt" face → cow/monster artwork
"Neither Leads" face → color clash illustration

SUGGESTION B · HUD COUNTER = SLIDE PROGRESS

Slide 0 (intro) → 000%
Slide 1 → 020%
Slide 2 → 040%
Slide 3 → 060%
Slide 4 → 080%
Slide 5 → 100%

SUGGESTION C · ENABLE WEBGL SHADER BACKGROUND

illus-shader-bg.js is complete
but not wired to the section.

BEFORE: flat #001219 background

AFTER:

the section promises a gallery – it needs to show one

CURRENT STATE

- ✓ Masthead design (Vol, Issue, Date)
- ✓ Hero post + 3 sidebar posts layout
- ✓ 3-column secondary grid
- ✓ 6 post cards with images + metadata

ISSUES

- Every link is href="#" — nothing is clickable
- "Visit the Full Blog" has no destination
- All content is hardcoded static HTML
- No update path without editing raw HTML
- Blog images are decorative placeholders

OPTION A · EXTERNAL BLOG (RECOMMENDED — LAUNCH NOW)

portfolio/index.html

blog.sergioayala.design

PROS: zero infra cost, launch today

CONS: manual sync ~monthly for portfolio cards

TIME: 1-2 hours to set up + write first post

OPTION B · HEADLESS CMS (MOST SCALABLE)

portfolio/index.html

Contentful / Sanity API

PROS: auto-updating, no HTML edits ever

CONS: API key mgmt, async fetch logic, rate limits

TIME: 1-2 days to integrate + test

VERDICT: _____

Start with Option A. If you post weekly for a month, migrate to Option B. Don't over-engineer a blog you haven't validated yet.

CURRENT STATE

- ✓ Full synthwave scene (stars, mountains, sun, grid)
- ✓ DeLorean CSS car with 5-state machine
- ✓ Asteroid canvas with collision detection
- ✓ GSAP boot sequence on intersection
- ✓ Mouse tracking with spring physics
- ✓ Contact info overlay (name, role, location)

ISSUES

- No contact form – email link opens OS mail client (leaves experience)
- Mobile: heavy scene (CSS car + canvas) on small screens
- No in-page confirmation after sending

SUGGESTION A · IN-PAGE CONTACT FORM (FORMSPREE / NETLIFY – FREE)

BEFORE (current):

```
SERGIO AYALA
Senior Art Director
Let's work together

✉ email (mailto:)
📧 @sersh01
💼 linkedin
```

AFTER (suggested):

```
SERGIO AYALA
Senior Art Director
Let's work together

| name
|
| email
|
| message
|
[ · send message · ]
```

DeLorean reacts to form submit → celebration depart animation

SUGGESTION B · MOBILE RESPONSIVE SCENE

DESKTOP (≥ 768px):

```
Full DeLorean scene
Asteroid canvas active
Full GSAP boot sequence
Mouse tracking on
```

MOBILE (< 768px):

```
★ ★ ★ ★ ★ ★ ★ | ← static starfield only
▲▲▲▲▲▲▲▲▲▲▲▲▲ | ← mountain silhouette
|
| SERGIO AYALA | ← horizon line
| [ contact form ] |
```

CURRENT STATE

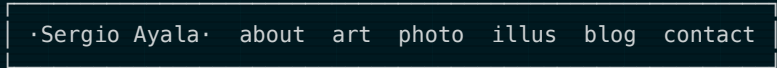

- ✓ 6 nav items with active scroll detection
- ✓ Per-section header background color
- ✓ Language toggle EN/ES persisted in localStorage
- ✓ Sound toggle with icon state
- ✓ Smooth scroll with custom easing (1600ms)

ISSUES

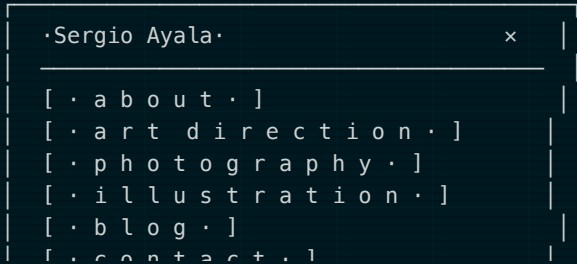

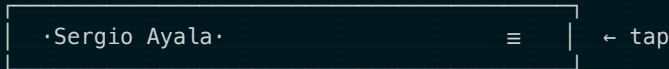

- No mobile menu – 6 items + language + sound overflow below ~900px
- No scroll progress indicator – users lose orientation in long SPA
- Nav overflow on mid-range tablets not handled

SUGGESTION A · MOBILE HAMBURGER / SLIDE-OUT DRAWER

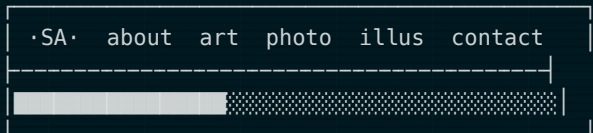

DESKTOP (≥ 900px) – unchanged:

MOBILE (< 900px):

SUGGESTION B · SCROLL PROGRESS BAR

↑ 2px bar, color = current section accent

Color transitions with the existing
--header-bg-[section] custom properties.
No new design tokens needed.
Pure CSS + scroll listener already present.

PRIORITY	SECTION	TASK
BUG	\$2 · About	Fix seal CTA placeholder email → <code>sergionook@gmail.com</code> or <code>href="#contact"</code>
HIGH	\$6 · Blog	All links are dead — choose blog architecture and wire live URLs
HIGH	\$3 · Art Direction	Add project imagery to accordion slides — section reads as resume without visuals
HIGH	\$4 · Photography	Populate 50 polaroid scroll-gallery cards with real photos from <code>/images/photo/</code>
HIGH	\$5 · Illustration	Add actual artwork to 3D cube faces — section promises gallery, delivers text
HIGH	\$8 · Navigation	Mobile hamburger menu — nav overflows below ~900px
MEDIUM	\$7 · Contact	Add contact form (Formspree/Netlify free tier) — mailto breaks mobile experience
MEDIUM	\$2 · About	Add CV download button below metrics row
MEDIUM	\$4 · Photography	Lightbox on polaroid click — reuse existing canvas glitch effect
MEDIUM	\$7 · Contact	Mobile scene optimization — hide DeLorean on small screens, show form
MEDIUM	\$1 · Intro	Wire scroll-hint.js panel — component already written, just needs activation
LOW	\$5 · Illustration	HUD counter tied to slide index (0-100%) using scramble animation from preloader
LOW	\$5 · Illustration	Enable WebGL shader background (<code>illus-shader-bg.js</code> is written but disabled)
LOW	\$3 · Art Direction	Letter grid → discipline navigation (click letter cluster → jump to that slide)
LOW	\$8 · Navigation	Scroll progress bar below header (2px, section-colored)
LOW	\$1 · Intro	Cyberpunk panel live stats (experience years, project count, availability, timezone)

[· PORTFOLIO AUDIT COMPLETE ·]

6 critical
5 medium
5 polish

START WITH THE BUG · FIX THE BLOG · ADD VISUALS TO ART DIRECTION
THEN POPULATE POLAROIDS · ILLUSTRATION ARTWORK · MOBILE NAV
EACH ITEM IS INDEPENDENT — TACKLE IN ANY ORDER
